

## **REBATE ON MOTOROLA TALKABOUT® TWO-WAY RADIOS**

### **JUST IN TIME FOR BACK TO SCHOOL**

ATLANTA (July 23, 2004) – Back to school means back to a hectic pace. From football games and cheerleading practice to school field trips, fall activities will keep families running in different directions. For families on the go, the Motorola Talkabout® T7100 two-way radio may be just the communication tool needed. Parents can take advantage of the radios while carpooling to games or in the neighborhood after school. Kids will be eager to use the radios camping or on other school outings.

Now, with a manufacturer's rebate of \$15 on Motorola Talkabout® T7100 (rechargeable model) two-way radios, keeping in touch is even more affordable. More information on Motorola Talkabout® two-way radios can be found at the Giant International Web site: { [HYPERLINK "http://www.giantintl.com"](http://www.giantintl.com) }. Motorola Talkabout® T7100 two-way radios with charging bases are available at most retail outlets (MSRP \$109.99).

The Motorola Talkabout® T7100 has 2.0 watts of power for up to a 7-mile range (tested range - your range may vary based on terrain, conditions and other RF interference). With a larger speaker and advanced technology, the T7100 features audio quality more comparative to a telephone or face-to-face conversation. There is also a reduction in the static hiss between words, so

families can carry on effortless conversations even while caravanning with the scouting troop in separate vehicles.

Parents can easily keep up with the kids thanks to the many channel combinations available: 22 frequencies with 38 private codes per frequency for a total of 836 channel combinations. These features provide for clear channels even in areas crowded with radio users like soccer fields and state recreation areas.

Whether ensuring the entire family stays connected on vacation at theme parks, camping, or even on a trip to the local mall, Motorola Talkabout® radios have the power to keep up. From the conveniently small T4500 to the robust T7100, Motorola Talkabout® radios come in a range of sizes with a wide array of features. For more information on Motorola Talkabout® two-way radios visit { HYPERLINK "<http://www.giantintl.com>" }.
