

**MOTOROLA AND GIANT INTERNATIONAL UNVEIL
LATEST MOTOROLA TALKABOUT® RADIO SERIES
FEATURING EXTENDED-RANGE CLARITY**

LAS VEGAS, NV (Jan. 8, 2004) -- Motorola (NASDAQ: MOT) and Giant International -- Motorola's Talkabout® strategic market alliance -- are introducing the Motorola Talkabout® T7100 -- a high-performance, long range two-way radio that offers Motorola's greatest range capability, up to 7-mile range*. The new model, designed for outdoor sports enthusiasts, is expected to be available in February 2004.

The new Motorola Talkabout® T7100 also includes outstanding features such as robust signal clarity, a larger acoustic radio cabinet and an oversized speaker for more natural sounding communications.

"The quality and size of the speaker provides a clear sound that any outdoor enthusiast will love," explained Giant International's Director of Marketing, Cortlandt Minnich. According to Minnich, the audio quality is more comparative to a telephone or face-to-face conversation. "The Motorola Talkabout® T7100 radio helps you hear the subtle verbal nuances that may be lost in other two-way radios, but which adds so much to voice recognition and conversational understanding," he added.

Motorola Talkabout® radios are designed to deliver outstanding range, while also offering those operating the radios in closer proximity with clarity and reliability.

Digitally Compressing Signals for Greater Clarity

The signal reliability is enhanced by companding digital compression technology, which eliminates static hiss.

This technology is an added value of the Motorola Talkabout®T7100 -- allowing outdoor enthusiasts and sportsmen to communicate over a longer range. When the companded signal is received -- even at long ranges -- it is digitally un-compressed, which restores signal and audio clarity by helping remove high-frequency "hiss." The result is a clear, recognizable voice message.

The new Motorola Talkabout ® T7100 is one of the Motorola "Extended Range" 7000 series of two-way radios with up to 7-mile range. it's designed for outdoor enthusiasts who need maximum range. These high-end, feature-rich radios have the built-in power to take advantage of that added range capability. The Motorola Talkabout® T7100 radios include both General Mobile Radio Service (GMRS) and Family Radio Service (FRS) frequencies.

"With the Motorola Talkabout® T7100, we have achieved a balance of range and signal clarity that leads the industry," Minnich said.

Convenient, State-of-the-Art, Consumer-Friendly Features

With a Manufacturer's Suggested Retail Price of \$89.99 (for the AA battery model) and \$109.99 (for the NiMH rechargeable model), the Motorola Talkabout

® T7100 offers a full-range of features, including:

- 2.0 -watt power, delivers up to 7-mile range*
