

GIANT INTERNATIONAL AND LENBROOK LAUNCH  
MOTOROLA TALKABOUT® GMRS TWO-WAY RADIOS

PICKERING, ON (June XX, 2004) -- Motorola (NASDAQ: MOT) and Giant International -- Motorola's Talkabout® strategic market alliance -- are introducing the next generation of consumer two-way radios - GMRS (General Mobile Radio Service) - to the Canadian marketplace.

New GMRS radio frequencies allow consumers greater range and more channel options than current family two-way radios (FRS). Distributed by Lenbrook Canada, the new product line that launches in September includes the Motorola Talkabout® T4500, T4905, T5500, T5920, T6500 and the T7100.

"We expect the longer range of GMRS will increase the consumer demand for two-way radios and result in a significant sales increase over last year in the category" said Bob Reeve, Vice President of Lenbrook Personal Electronics Group. "

"Motorola Talkabout® two-way radio users will benefit from the extended range and larger number of available channels provided by the additional power and frequencies available with GMRS," said Cortlandt Minnich, Vice President of Marketing for Giant International. "Combining GMRS technology with Motorola engineering, these radios are ideal for active family and outdoor communications."

Whether ensuring the entire family stays connected on vacation at theme parks, camping, or even on a trip to the local mall, Motorola Talkabout® radios have the power to keep up with an energetic family. From the conveniently small T4500 to the robust T7100, Motorola Talkabout® radios come in a range of sizes with a variety of features.

Leading the new line, the Motorola Talkabout® T7100, which has a range of up to 11 kilometers and includes outstanding features such as robust signal clarity, a larger acoustic radio cabinet and an oversized speaker for more natural sounding communications. The signal reliability is enhanced by companding digital compression technology, which eliminates static hiss. This technology is an added value of the Motorola Talkabout® T7100 which enables outdoor enthusiasts and sportsmen to communicate over a longer range. Both General Mobile Radio Service (GMRS) and Family Radio Service (FRS) frequencies are available on the T7100 radios. The T4905, T5500, T5920, and T6500 also operate at both GMRS and FRS frequencies.

### ABOUT MOTOROLA TALKABOUT® RADIOS

A series of new, next-generation Motorola Talkabout® hand-held two-way radios are being released to the Canadian market in the second half of 2004 by Motorola and their strategic market alliance, Atlanta-based Giant International, Ltd. In Canada, Motorola GMRS products will be distributed and marketed through Lenbrook Canada, Pickering, Ontario. The Motorola Talkabout® represents the state-of-the-art in hand-held two-way personal radio
