## MOTOROLA TALKABOUT® T7400 TWO-WAY RADIO SERIES

The Motorola Talkabout® T7400 is the ultimate in radio communication sound quality. This robust, tough two-way is definitely not for the feeble. With an expansive backlit display for easy viewing, and large speakers for superior sound quality, the T7400 is loaded with features to make it tough enough to handle any situation.

### NOAA WEATHER CHANNEL

Not sure what to pack for the racetrack? Then tune into a NOAA channel (National Oceanic and Atmospheric Administration) on your T7400 for continuous local and regional weather broadcasting. And when you are out deep-sea fishing or at the lake, weather alerts will provide you with warnings of incoming weather to protect you and your friends from the dangers of a sudden storm.

### FULL-FEATURED PRIVACY

Fact is, you're not the only one who knows the benefits of taking a Talkabout® with you. To prevent cluttered channels, the T7400 has a full 22-channel capacity each with 99 privacy codes, creating 2,662 combinations. Additionally, Priority scan quickly finds the most private channel in crowded environments, and with the QT™ (Quiet Talk) interruption filter enabled, radios from other manufacturers cannot be heard on your channel ensuring a private conversation for your group.

### SILENT SIGNALS

When you are at that monster truck rally or speeding in a cigarette boat, you will still get every communication with the VibraCall® silent vibrating ringer. Just switch to the T7400 VibraCall® to be alerted of incoming calls.

### COMPANDING

The T7400 has a Motorola exclusive feature —“companding”— a sophisticated digital technology that filters out static between words. This allows the radio to deliver noticeably clearer transmission.

### PRICING

Manufacturer's Suggested Retail Price is \$79.99 (Alkaline) or \$99.99 (NiMH) per pair. Also available: Model T7450, with MSRP \$129.99 per pair.

\*How far can I expect my radios to communicate? The communication range quoted is calculated under optimum conditions, with an unobstructed line of sight. Actual range will vary depending on terrain and conditions, and is often less than the maximum possible. Your actual range will be limited by several factors including, but not limited to, terrain, weather conditions, electromagnetic interference, and obstructions. Please visit [www.giantintl.com/range](http://www.giantintl.com/range) for further information.
