Loud, Clear and Mostly Sunny

Motorola Talkabout® T5920/T5950 Two-Way Radio Series

One of the rugged “Sports Series” of up to 5-mile range,* two-way radio models designed specifically for serious outdoor enthusiasts and active families. Combining General Mobile Radio Service (GMRS) technology with Motorola engineering, this radio is ideal for active outdoor communications.

NOAA Weather on Demand (T5950)

Weather conditions, tides and forecasts where you need them most—outdoors. A press of the button gives the information every outdoor enthusiast should know. NOAA (National Oceanic and Atmospheric Administration) provides continuous weather broadcasts.**

Durable Styling

The Talkabout® T5920 has rugged rubber grips for easier handling whether it's being used for hunting, fishing or camping trips, or hiking, biking or jogging in the neighborhood.

Full-Featured Privacy

The Talkabout® T5920/T5950 have full 22-frequency capacity, and unlike our competitors, they have 99 Motorola exclusive codes, so there are more channel combinations available than ever. Our “Priority Scan” quickly helps you find the most

private channel to give you a clear, interruption-free conversation. And when you enable the Talkabout's exclusive QT noise filter, radios from other manufacturers can't be heard on your channel.

Silent Signals

These radios have a silent vibrating ringer especially useful for sportsmen—and for those other applications where ringing can be intrusive. It is also useful in a loud, crowded environment where ring tones might be hard to hear.

Accessories for Easy Operations

This model features an accessory connector for headset operation, as well as a no-accessory hands-free capability so you can talk speakerphone-style.

Power to Spare

These radios are sold in pairs—just charge up the rechargeable NiCd power unit or insert three AA batteries and you're ready to start communicating.

Pricing

Manufacturer's Suggested Retail Price ranges from \$69.99 - \$99.99 per pair.
